

This is in reference to the letter dated 08.07.2021 regarding 100% Aadhaar updation of Pre-CLAP cases and treatment of Multiple Disbursement (copy of letter is attached for reference). In this connection, please find below one more clarification **on Aadhaar Updation of the CLSS cases.**

Aadhaar Updation the CLSS cases – If PLI/Banks have generated a new Application ID after 25th Nov, 2019 against the subsequent cases of the same beneficiary wherein their older instalment cases are with different Applicant ID without Aadhaar details in the CLAP database and PLI/Banks are trying to update Aadhaar information against the older cases.

Explanation: In order to resolve these types of duplicate cases wherein both the cases, beneficiary remains the same, PLI/Banks after validation through Central Nodal Agencies (CNAs) may merge both cases into one and allocate the older application id to the beneficiary and then update Aadhaar information against the older application id.
